Web & AI engineering that unburdens product teams.
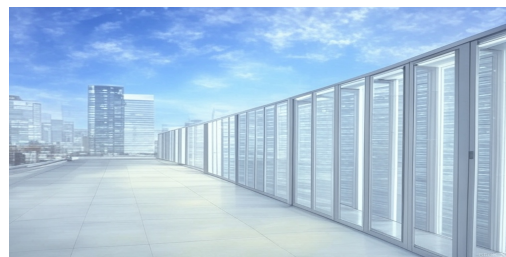

We plan, build, and run secure web and AI solutions
with clear architecture, short iterations,
and measurable results.

Onboarding in 1 week

MVP in 6-8 weeks

GDPR-ready

Practical & efficient

Interdisciplinary squads
deliver regularly,
so your teams can release
faster.

How we work

1. Kick-off: clarify goals, capture stories in Storymaster.
2. Prioritization: evaluate value, effort, and risk.
3. Architecture: scalable, secure, review with stakeholders.
4. Delivery: interdisciplinary squads ship iteratively.
5. Operations: monitoring, docs, knowledge transfer.

You get

A. Dedicated tech lead and product contact.
B. Transparent project plan with effort, risks, quick wins.
C. Security and privacy in every step.
D. Storymaster backlog stays your property, extensible.

1-day workshop

1. Define goals and success metrics.
2. Technical check of systems, data, interfaces.
3. Ideation for web, portals, or AI workflows.
4. Prioritize and select an MVP.
5. Roadmap, owners, next steps.

Let's get started.

We make technology predictable,
so your team can focus on product impact.
Thank you for your trust.
